Western Nevada Supply Expands its GREEN Solutions.

Since 1964, Western Nevada Supply and Western Supply or better known as the "Blue Team" has been providing Northern Nevada, plumbing, water works, HVAC, and irrigation products to contractors. As one of the premier wholesale plumbing houses in the industry, The Blue Team has taken their very successful team concept and expanded into GREEN solutions such as Hydronics, Solar, Solar Thermal, Photovoltaic and Geo-Thermal ground source-heating and cooling solutions.

"The Western Nevada Supply philosophy of adhering to the needs of our customers, employees, and the community at all times, fits perfectly with our expansion into green products and solutions," says, Russ Cartwright, Solar Thermal and Photovoltaic Sales Manager. "We saw an opportunity for our contractors to expand their services and we wanted to be at the forefront. Not only are we stocking and supplying parts for solar, hydronics and geo-thermal ground source-heating and cooling solutions, but we are also offering training to our contractors so they can upsell, increase their business offerings and encourage their customers to go green," stated Cartwright.

To learn more about Western Nevada Supply's continuing green education or their renewable energy lines, call (775) 353-0281 or visit www.goblueteam.com
